MEMORANDUM FOR THE NATIONAL FOREIGN INTELLIGENCE BOARD

25X1A

FROM : []
Executive Secretary

SUBJECT : Overview of Imagery Satellite Issues,
Activities and Planning

The attached document is circulated for information and background. It provides an overview of current and planned satellite imagery activities and discusses the strategy reflected by these activities and plans. The document also identifies issues that will require further action and attention. It should be noted that there are already a number of major community efforts underway which relate to the issues and that other documents present evaluative data on the substantive intelligence contribution of the imagery systems.
